

Skin Disease Report

Disease: Ringworm

Confidence: 83.70%

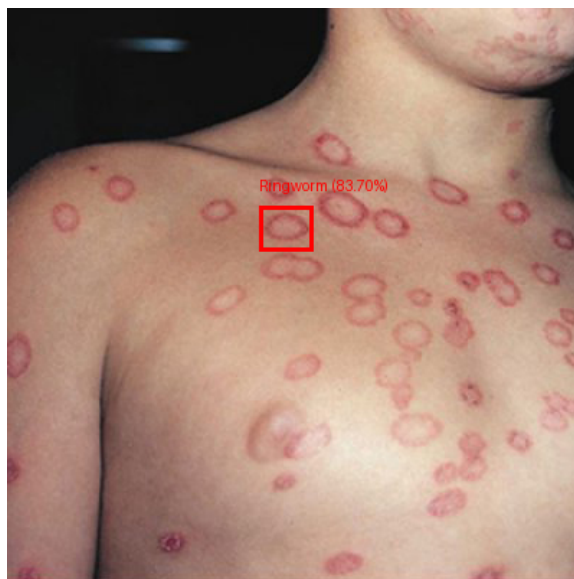

Description: Ringworm (dermatophytosis) is a common fungal infection of the skin, hair, or nails. It typically presents as a red, itchy, circular rash with clearer skin in the center.

Symptoms:

- Circular, red, itchy rash
- Scaly skin with raised borders
- Hair loss (on scalp or beard)
- Brittle or discolored nails

Care Tips:

- Keep affected area clean and dry.
- Apply antifungal creams, powders, or sprays (OTC).
- Avoid sharing personal items (towels, clothing).
- Wear loose-fitting clothing.
- For widespread or persistent infections, consult a doctor for oral antifungals.
