

Skin Disease Report

Disease: Psoriasis

Confidence: 42.99%

Description: Psoriasis is an autoimmune condition causing rapid skin cell buildup, leading to thick, scaly patches, typically on elbows, knees, scalp, and lower back.

Symptoms:

- Red patches with silvery scales (plaques)
- Itching, burning, or soreness
- Dry, cracked skin that may bleed
- Thickened, pitted, or ridged nails
- Swollen and stiff joints (Psoriatic Arthritis)

Care Tips:

- Use moisturizers to soothe and hydrate.
- Avoid triggers like stress, injury, and certain medications.
- Topical treatments (corticosteroids, vitamin D analogs).
- Light therapy (UVB, PUVA) under medical supervision.
- Systemic medications or biologics for severe cases, prescribed by a dermatologist.
